What is tocopheryl?
Alpha-tocopheryl acetate (ATA) is a specific form of vitamin E thats often found in skin care products and dietary supplements. its also knows as tocopheryl acetate, or vitamin E acetate. Youll Find ATA in a variety of skin care products. The antioxidant properties of vitamin E can help to prevent damage to skin caused by free radicals from UV exposure. Vitamin E may also have an anti-inflammatory effect on the skin.

What is allantoin?
This medication is used as a moisturizer to treat or prevent dry, rough, scaly, itchy skin and minor skin irritations. Emollients are substances that soften and moisturize the skin and decrease itching and flaking. allantoin protects your skin From Harmful UV rays and moisturizes it.

What is micronized tio2?
Titanium Dioxide is typically micronized and coated for use in cosmetics products. The micronizing makes this somewhat heavy-feeling ingredient easier to spread on the skin, plus a bit more cosmetically elegant. It is naturally opaque and bright, which makes it useful for use in cosmetics. it is also resistant to ultraviolet (UV) light, and is used widely in sunscreens and pigments that are likely to be exposed to UV light. it is used in a wide variety of personal care products, including in sunscreens.

Retinol Eye Contour

What is ginseng extract?
Ginseng is a beneficial ingredient for the skin. When applied topically, it may diminish the appearance of fine lines, reduce inflammation, boost hydration and protect the skin barrier.

What is kojic acid?
For dark circles and under eyes caused by an overproduction of melanin, kojic acid can help. As a tyrosinase inhibitor, kojic Acid may effectively stunt your body's natural melanin production. Aesthetically this means it appears to even skin tone and fade dark spots.

What is retinyl palmitate?
Retinol around the eye area can be beneficial for treating wrinkles, crow's feet, and dark circles. The ingredient can be harsh when used on this part of the face. That's why Retrouvé's retinyl palmitate- powered eye cream is a great option for anyone looking for anti-aging benefits.

What is micronized tio2?
Outer beauty is a reflection of inner health. Proper nutrition is the key to promoting and maintaining healthy skin, scalp, and hair; therefore, priming the skin and hair with adequate minerals is an excellent means to deeply nourishing both. ACB Bio-Chelate 5 PF consists of five fermented, essential minerals: zinc, iron, silicon, copper and magnesium. Through fermentation, these minerals are transformed into a bio-active material that is easily recognized by our skin, scalp and hair. To clarify, the fermented minerals that make up ACB Bio-Chelate 5 PF become a powerhouse of benefits, efficaciously enhancing barrier function, increasing growth factor expression, decreasing stress related factors, increasing cellular energy production and acting as an anti-inflammatory.

What is vitamin p.p?
are very similar; however Niacinamide does not give the typical flush caused by Niacin and is therefore often preferred as active ingredients in face creams. Vitamin PP is indeed one of the most loved anti-ageing ingredients, thanks to its wide and effective range of properties. Vitamin PP helps increase the production of collagen and elastin, which gives the skin tone and elasticity and reduces the appearance of wrinkles and fine lines. Vitamin PP also stimulates the production of ceramides and fatty acids, improving the natural protective barrier of the skin. This property makes Vitamin PP a valid ally of Vitamin A, a powerful anti-wrinkle ingredient, which may impair or reduce the skins ability to may impair or reduce the skin's ability to retain water. Using Niacinamide in conjunction with Vitamin A will reduce this effect, keeping the skin moisturised. Vitamin PP slows down the migration of melanin from the bottom layers of the epidermis to the most superficial ones, thus reducing the appearance of sunspots. Vitamin PPs powerful antioxidant properties have positive effects of sallow, dull skin, leaving it more luminous and healthier-looking.

How To Use	The best way is to use the lotion when the skin is still moist after the shower as it can then penetrate better into the epidermis Don't apply too much, don't let a white layer stay on the skin. The lotion should then be well penetrated by massaging emphasizing dry parts such as knees and elbow.

شیوه مصرف بهترین زمان استفاده از لوسیون بدن زمانی است که پوست پس از استحمام هنوز کمی مرطوب است، زیرا در این حالت جذب آن در لایه‌های سطحی پوست بهتر انجام می‌شود. مقدار مناسبی از لوسیون را استفاده کنید و از مصرف بیش از حد به‌گونه‌ای که لایه سفید روی پوست باقی بماند، خودداری نمایید. لوسیون را با ماساژ ملایم روی پوست پخش کنید و توجه ویژه‌ای به نواحی خشک‌تر مانند زانوها و آرنج‌ها داشته باشید تا کاملاً جذب شود.

MOISTURIZING BODY LOTION

VASELIN OIL
It is an oil that softens and softens the skin. It has moisturizing side and increases the water content of the skin and keeps it soft and smooth.

JOJOBA OIL
This oil strengthens the skin's hydrolipidic film and provides it with the necessary hydration. It has anti-aging properties and reduces the effects of skin aging by its moisturizing power and regenerating properties but also by its protective power of UV rays. It provides flexibility and elasticity. It also has healing, anti-inflammatory, soothing and emollient virtues. Jojoba oil has a composition close to the sebum of our skin, which is why it reduces excess sebum and rebalances oily skin with acne tendency.

SUNFLOWER OIL
This oil is rich in linoleic acid (omega 6) playing an important role in skin hydration. Indeed, this fatty acid is one of the lipid elements essential for the functioning of the membrane, this contribution therefore makes it possible to protect the skin capsules and fight against external aggressions (UV, pollution, heat, etc.). Also rich in vitamin E, its antioxidant action makes it possible to claim protection against skin aging.

AQUAXYL®
the power of a patented sweet combination, optimizes skin water flow. Its mechanism of action controls the circulation of water and its reserves. Its "anti-dehydration shield" action is ensured by reinforcing the synthesis of essential lipids and proteins involved in the organization of the stratum corneum.

UREA
Widely used in cosmetics and dermatological preparations, urea is known for its intense moisturizing properties and its keratolytic effect. It incorporates your cosmetic preparations to promote the elimination of dandruff and restore suppleness and softness to very dry, rough or scaly skin. Its gentle exfoliating power and excellent skin tolerance also make it a good alternative to AHA fruit acids to smooth out skin irregularities and restore radiance to the complexion. It is also the asset of choice for treating calluses on the feet or hands.

GLYCERIN
Moisturizing agent

ALOE VERA
Aloe vera powder, made up of many essential vitamins and minerals, soothes irritated skin and regenerates it by stimulating the renewal of the skin thanks to the action of amino acids in particular. It also has healing properties thanks to the action of enzymes.
Aloe vera is a humectant: its hygroscopic properties allow it to attract and retain surrounding water.
